Team Research Project Presentation Format
CS544/444 - Spring 2016
Draft Due: April 18, 2015

Title page: Include team name and names of team members
Abstract: Include a paragraph summary description of your project
Contents:

1. **Introduction. (10 points)**
   a. Problem description and statement of what your research project is about
   b. Related Work - Describe any related work to your topic that you used as references or background research that is relevant to your topic area.
   c. Motivation - What motivated your team to research this topic?
2. **Background. (5 points)** Information that helped you research your topic. (Expand upon and describe the work referenced in 1b.)
3. **Research procedures. (5 points)** Description of the methods used by your team to answer your research questions. Include what tools you used to conduct this research.
4. **Experiments. (10 points)** Describe what experiments your team conducted.
5. **Data. (20 points)** Include the data you collected to help answer the research questions
6. **Results. (20 points)** Discussion of the results (i.e. your analysis) that you obtained from your experiments.
7. **Conclusion. (15 points)** What has your team accomplished and learned from this research? What would you like to see done in the future if another team picked up this project where you left off?
8. **References. (5 points)**
